EDUCATION

Addis Ababa University
Bachelor of Science in Physics

Addis Ababa, Ethiopia
Sep. 2025 – June 2029(Expected)

EXPERIENCE

Student Researcher

Feb. 2025 – Dec. 2025

Ethiopian Space Science Society

Addis Ababa, Ethiopia

- Requested and managed telescope observation time through the LCO network for supernova observations.
- Processed calibrated astronomical images and performed photometric analysis on a Type Ia supernova using AstroImageJ.
- Collaborated with team members to monitor research progress and investigate the role of Type Ia supernovae as cosmological distance indicators.
- Contributed to the preparation of a scientific preprint published on Zenodo. (DOI:10.5281/zenodo.17524559)

Founder & CEO

Aug. 2025 – Present

PULSAR Education

Addis Ababa, Ethiopia

- Founded and led a student-driven astronomy initiative dedicated to expanding access to space science education across Africa and beyond.
- Built a growing science communication platform with more than 2.7K followers across social media platforms.
- Manage the organization's WordPress website, including plugin configuration, content publishing, and site administration.

Project Manager - Citizen Science Projects

Dec. 2025 – Present

Ethiopian Space Science Society

Addis Ababa, Ethiopia

- Coordinated citizen science project activities, team meetings, and participant onboarding processes.
- Monitored project progress, communicated updates with members and the International Asteroid Search Collaboration(IASC) through email, and supported collaboration across multiple team structures.
- Prepared announcements, reminders, and coordination materials.

Event Coordinator – Stargazing Program

Dec. 2025 – Present

Ethiopian Space Science Society

Addis Ababa, Ethiopia

- Trained in operating refractive and reflective telescopes for public astronomy outreach events.
- Guided participants during monthly stargazing programs by introducing observable celestial targets and basic observational astronomy concepts.
- Assisted in organizing outreach events and coordinating telescope setup activities.

Volunteer

Aug. 2024 – Present

Zooniverse

Onsite

- Contributed to the classification and analysis of more than 200 celestial objects through citizen science research projects.
- Assisted in identifying distant galaxies, minor planets, and potential Near-Earth Objects using observational datasets.

PROJECTS

Pathways to Space 2025 Program - Documentary Project

May 2025 – Oct. 2025

- Collaborated in a team documentary project focused on space exploration, human spaceflight, and future space technologies.
- Served as narrator, script writer, and co-video editor for the production.
- Participated in workshops and training sessions on human support systems in space, mission control operations, and VR-based spacecraft docking simulations led by international experts.

TECHNICAL SKILLS

Language: Python (Beginner)

Astronomy Software: AstroImageJ, Astrometrica, Siril

Other Tools: GIMP, WordPress, LaTeX

Skills: Photometric Analysis, Data Analysis, Science Communication

COURSES

Astronomy: Exploring Time and Space(2024), Astrobiology and the Search for Extraterrestrial Life(2025)

AWARDS/HONORS

National Math Contest 1st place(2025) by Strathmore University(Kenya), Top 15 National Finalist for the International Olympiad on Astronomy and Astrophysics(2025)
